Subject: Kinko's Contract

My campus was evaluated in the spring, and rooms/offices were assigned specific printers. The printers have not yet been delivered, and I am glad they have not.

My concern is that I remember reading a statement about documents of a modest number of pages and that require stapling having to be delivered to Kinko's, whereas, we now are able to use our copier for sorting and stapling documents right on our campuses. It seems that it would be quite expensive, and benefit Kinko's more than it would benefit our campuses.
